Message from the Editor-in-Chief

Diversity (ISSN 1424-2818)

is a scholarly journal that covers all areas of biodiversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Aims

Diversity publishes research papers, short communications, and review papers. There is no restriction on the length of the papers. Our aim is to encourage scientists to publish their experimental and theoretical research in as much detail as possible.

Scope

Organismic diversity and diversity preservation

- Systematics, taxonomy (only if accompanied by DNA studies)
- Paleontology
- Global change effects on biodiversity (Anthropocene biodiversity loss)
- Invasive organisms
- Conservation management

General aspects of diversity assessment

- Statistical methods
- Mathematical models
- Computational methods
- Modeling
- Next-generation sequencing and DNA barcoding

Molecular evolution and ecology

- Molecular phylogeny and phylogeography
- Genetic diversity
- Population genetics and ecology
- Evolution (including micro- and macroevolution)
- Community ecology
- Restoration ecology
- Marine ecology
- Aquatic ecology
- Terrestrial ecology
- Diversity, evolution, and ecology of secondary metabolites
- Chemical ecology
