Message from the Editor-in-Chief

I am very excited about announcing the launch of a new Journal—*Gastrointestinal Disorders* (ISSN 2624-5647). As Editor-in-Chief of this new venture, I can inform you that I am supported by a world class Editorial Board—selected because of their international stature and their wellrecognized contributions to their specific fields of interest in the broad pantheon of gastroenterology. A common thread here is the desire to publish in a great journal that will be widely distributed, read, and recommended so that findings and observations can be fully recognized with the objectives to improve the medical care and outcomes for our patients—that a bench to bedside and back to the bench approach addresses the questions that invariably arise from the initial report or discovery will be the translational thrust of the articles that we seek to publish. We want to reach out to our clinical colleagues and make sure they know “this is your kind of journal”—“there is a place here for you”.

Editor-in-Chief

Prof. Dr. Richard W. McCallum

Aims

Gastrointestinal Disorders (ISSN 2624-5647) is an open access journal dedicated to clinical and basic research in gastroenterology. Our aim is to encourage scientists to publish their theoretical and experimental results in as much detail as possible. We also aim to gather the latest, most relevant studies, case series with accompanying systematic literature reviews, as well as endoscopic technical expertise for instant dissemination in the field of gastroenterology.

Scope

- Diseases involving the gastrointestinal tract (esophagus, stomach, small intestine, large intestine and rectum, and the pancreas accessory organ of digestion)
- Diagnosis and treatment in gastroenterology
- Nutrition in gastroenterology
- Pathology in gastroenterology
- Epidemiology in gastroenterology
- Therapeutics and pharmacology involving treatment
- outcomes and chemical traces in the world of diagnostic and therapeutic endoscopy

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

Journal Rank

CiteScore - Q2 (Immunology and Microbiology (miscellaneous))

Coverage by Leading Indexing Services

Scopus, ESCI (Web of Science), FSTA, and other databases

Rapid Publication

A first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025)
