Message from the Editor-in-Chief

The new open access journal *Forecasting* provides an interdisciplinary forum for all aspects related to the immensely broad field of time series analysis and forecasting. The analysis of past temporal information (time series, generally composed of samples obtained at regular intervals along with their exogenous variables that can influence the system planned to be analyzed), with the objective of predicting or forecasting future values, is a multidisciplinary research field and has become the topic of an ever increasing number of publications in recent years. The range of applications in forecasting is enormous, from energy forecasting or economic analysis of stock indices prediction, climate forecasting, chemical or natural process forecasting, etc. It is the aim of the journal to publish relevant topical contributions for the scientific community of forecasting in a timely manner. We would like to invite you to contribute to the journal by sending us your high quality research papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Sonia Leva

Aims

Forecasting (ISSN 2571-9394) is an international, peer-reviewed, open-access journal, which provides an advanced forum for studies related to forecasting: theoretical, practical, computational, and methodological. It publishes regular research papers, communications, letters, short notes, and reviews. Our aim is to encourage researchers to publish their experimental, theoretical, and computational results in as much detail as necessary. There is no restriction on the maximum length of the papers, number of figures or colors.

Scope

- Forecasting in computer science
- Forecasting methodology
- Forecasting in economics and management
- Power and energy forecasting
- Weather and forecasting
- Environmental forecasting
- Forecasting applications in society

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

2024 Impact Factor: 3.2

(*Journal Citation Reports* - Clarivate, 2025)
