Message from the Editor-in-Chief

As urban environments continue to evolve, *Smart Cities* serves as a key platform for sharing innovative research that addresses the complexities of modern urban life. Our journal provides a space for interdisciplinary dialogue and knowledge exchange on the latest advancements in smart city technologies and practices. We prioritize research that not only pushes the boundaries of scientific understanding but also has practical implications for improving urban living, sustainability, and governance.

We welcome contributions from diverse fields that bring fresh perspectives to urban challenges, from smart infrastructure and IoT integration to data-driven decision-making and sustainable development. Through a combination of rigorous peer-review and rapid publication, we aim to disseminate impactful research that fosters the development of smarter, more resilient cities.

Editor-in-Chief

Prof. Dr. Pierluigi Siano

Associate Editors

Prof. Dr. Isam Shahrour
Dr. Hassan Haes Alhelou

Aims

Smart Cities (ISSN 2624-6511) provides an advanced forum for the dissemination of information on the science and technology of smart cities, publishing reviews, regular research papers (articles) and communications in all areas of research concerning smart cities. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible, with no restriction on the maximum length of the papers published so that all experimental results can be reproduced.

Where applicable, articles should combine modeling/simulations and/or experimentation for idea validation. Simulation tests virtually validate the proposed methods, while experiments provide real-world validation, fostering collaboration and robust inquiry.

The journal also seeks contributions that focus on the analysis and assessment of smart city development and management regarding city design, governance and policy implementation. These contributions should involve new and interesting aspects and be based on solid theoretical foundations. They should also go beyond specific *city profiles* and enhance the overall theoretical and conceptual understanding of smart cities and territories.

Scope

Topics include, but are not limited to, the following:

- Information and communication technology (ICT) in the smart city;
- The Internet of Things (IoT) for smart cities;
- Smart sensing;
- Smart grids and smart infrastructures;
- Smart transportation and mobility;
- Smart energy;
- Smart buildings;
- Smart food and agriculture;
- Smart governance;
- Smart people;
- Smart economy;
- Smart healthcare;
- Smart living.

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

Journal Rank

JCR - Q1 (Urban Studies) / CiteScore - Q1 (Urban Studies)

Rapid Publication

A first decision is provided to authors approximately 26.8 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the first half of 2025)
