Message from the Editor-in-Chief

Reactions (ISSN 2624-781X) is a peer-reviewed and open access journal which provides a unifying research framework for a broad range of fundamental and applied aspects of chemical reactions. Various topics, including development of new reactions and methodologies, reaction mechanism and kinetics, complex reactions, reaction engineering, catalysis, and reactor technology, among others, are of interest.

All articles undergo a rigorous peer-review process. We would like to invite you to contribute to the journal by sending your high quality research papers. The editorial focus is on scientifically proven work within the scope of the journal rather than considerations of its future impact.
