Message from the Editor-in-Chief

Obesity covers a wide range of research fields related to obesity, including cell experiments, animal experiments, and clinical research. As a researcher in the field of food science, I believe that diet is important for preventing and reducing the incidence of obesity; therefore, I would like to expand the scope of this journal to include not only dietary therapy but also the physiological functions of food components that lead to a reduction in the incidence of obesity and its related diseases. We encourage you to submit papers on any topic related to obesity and adipocytes. As *Obesity* is an open access journal, your article will be published online immediately upon acceptance. Readers will have unlimited free access to the content once published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Nobuyuki Takahashi

Aims

Obesity (ISSN 2673-4168) is an open access journal that provides an advanced forum for studies of obesity in the areas of nutrition, diabetes, bariatric surgery, public health, pediatrics, basic science, exercise, eating disorders, psychology, genetics, biochemistry, physiology, molecular, metabolic, epidemiological aspects of obesity, and related disorders. We encourage scientists to publish their experimental and theoretical results in as much detail as possible. The full experimental details must be provided so that the results can be reproduced. There is no restriction on the length of the papers. We also encourage the publication of timely reviews and commentaries on topics of interest to obesity research.

Publications can be in the form of reviews, regular research papers, communications, conference reports. Large electronic files, software, movies, etc., that cannot be published in the main paper can be posted as supplementary material.

Scope

- Obesity Biology and Integrated Physiology
- Clinical Trials and Investigations
- Pediatric Obesity
- Epidemiology/Genetics
- Nutritional medicine
- Clinical nutrition medicine
- Genetics and nutrition
- Nutritional epidemiology
- Pharmacology
- Adipogenesis

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

2024 Impact Factor: 1.3

(*Journal Citation Reports* - Clarivate, 2025)

Coverage by Leading Indexing Services

ESCI (Web of Science), Scopus and other databases

Rapid Publication

A first decision is provided to authors approximately 13.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025)
