Message from the Editor-in-Chief

Stresses is an open access international journal publishing top quality research covering all aspects of how humans, animals, plants, algae, fungi, bacteria, and viruses respond to abiotic and biotic stresses. The thinking behind *Stresses* is substantially inspired by the pioneering studies on the effects and responses to various stressors performed by the eminent scientist Hans Selye. Submissions from basic and applied research are welcome, as long as they are based on a clearly defined mechanistic hypothesis. Review manuscripts are encouraged, but they must be a critical review of existing literature and not just a summary. All submitted manuscripts will be subjected to a thorough peer-reviewing process.

Aims

Stresses (ISSN 2673-7140) publishes top-quality research covering all aspects of how biological systems—including humans, animals, plants, algae, fungi, bacteria, and viruses—respond to abiotic and biotic stresses. Molecular, biochemical, physiological, morphological, (ultra) structural, cellular, histo-anatomical, morphogenetic, organismic, community and ecological aspects are of interest to the journal, provided that response(s) to stress factor(s) are clearly focused in the submitted work. *Stress* induced by climate change, exposure to xenochemicals and toxins, infection or injury, as well as phyto/bioremediation aspects, are positively considered for publication.

Scope

Stresses covers the following areas of interest, provided that response(s) to stress factor(s) are clearly focused by the submissions:

- molecular,
- biochemical,
- physiological,
- morphological,
- (ultra)structural,
- cellular,
- histo-anatomical,
- morphogenetic,
- organismic,
- community,
- ecological aspects.

Stress induced by climate change, exposure to xenochemicals and toxins, infection or injury, as well as phyto/bioremediation aspects, are also positively considered for publication.

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

Coverage by Leading Indexing Services

Scopus and other databases

Rapid Publication

A first decision is provided to authors approximately 25.2 days after submission; acceptance to publication is undertaken in 4.1 days (median values for papers published in this journal in the first half of 2025)
