Biology and Life Sciences Forum

Biology and Life Sciences Forum is an open access journal dedicated to publishing findings resulting from conferences, workshops, and similar events, in all areas of biology, life sciences and at the interface of related disciplines. Published items are approved by the conference committee and original research content is peer reviewed.

If you are organizing an academic conference and are interested in our services, please use the link below to get a quotation:

Publication Type

Proceeding Paper

These papers should report new evidence or conclusions and are expanded versions of work presented in a conference presentation. Conference proceedings can be incomplete works that report on an idea, technique, or important results, thus providing readers with a brief overview of recent work or specific projects of significant interest. The structure is similar to that of a standard research article and it should include sections such as an introduction, methods, results, conclusions, etc. It is recommended that the length should not exceed eight pages.

Conference Report

Conference reports are records of the events of a conference, seminar, or meeting. They should provide a comprehensive overview of a meeting or session, along with relevant background information for the reader. They are typically not peer-reviewed. The structure should contain an abstract, keywords, introduction, conference sections, and concluding remarks, with a suggested minimum word count of 2500 words. They can also include all accepted meeting abstracts.

All published items will be assigned a digital object identifier (DOI) and be citable. Posters, videos, and PPT presentations can be published together as Supplementary Materials.

Publication Procedure

- Conference organizers submit a proposal to *Biology and Life Sciences Forum*.
- Evaluation by the *Biology and Life Sciences Forum* editorial office.
- Creation and signing of an agreement which covers the costs and services.
- *Biology and Life Sciences Forum* supplies article templates and logos to the conference organizer for announcement on the conference website.
- Conference organizers collect submissions and perform a peer review.
- Accepted papers and peer review records are delivered to *Biology and Life Sciences Forum* by a fixed date (before or after your conference).
- General check by the journal team and scientific check by academic editors; unqualified submissions will be rejected.
- Production, proofreading, and publication arranged by the *Biology and Life Sciences Forum* Editorial team.
- All authors are notified by the journal once the volume has been finalized.
- Final invoicing of the conference organizer.

Conference Organizer Benefits

Open Access

Unlimited and free access for readers.

A dedicated webpage for your conference

containing all conference abstracts, an attractive cover and a description of the conference, along with links to the conference homepage.

Flexibility

All kinds of outputs from the conferences can be included in the *Biology and Life Sciences Forum*, including proceedings, posters, etc.

High visibility

All published items will be assigned a digital object identifier (DOI) are citable, are available on mdpi.com, and appear on search engines such as Google Scholar.

Sciforum support

Optionally use of our free, professional platform to host your scientific conference, including the conference website, peer-review, and many additional features.

Free services

Regular language editing services, electronic reprint book, etc.

Additional services available

Options include extensive language editing, abstracts delivered on USB drives, printed books, etc.

Promotion

of your conference on MDPI journal websites, through newsletters and social media.
