Message from the Editor-in-Chief

Journal of Dementia and Alzheimer's Disease (JDAD) is an international, peer-reviewed, open access journal. It focuses on all types of dementia, with an emphasis on Alzheimer's disease and research on memory. Biological studies that address molecular and cellular aspects of disease onset and progression, as well as clinical studies, are welcome.

The journal publishes research papers, reviews, editorials, communications, etc. Our aim is to encourage scientists to report their experimental and theoretical results in as much detail as possible.

We look forward to receiving your contributions in the near future.

Editor-in-Chief

Prof. Dr. Magda Tsolaki

Aims

Journal of Dementia and Alzheimer's Disease (ISSN 3042-4518) is an international, peer-reviewed, open access journal. It publishes original research articles, reviews, communications, etc., that offer new insights into all types of dementia, with an emphasis on Alzheimer's disease and research on memory. Biological studies that focus on molecular and cellular aspects of disease onset and progression, as well as clinical studies, are welcome. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible, and full experimental details must be provided when publishing research so that the results can be reproduced. There is no restriction on the maximum length of papers.

Scope

- The cellular and molecular mechanisms of dementia;
- Memory disorders and sleep, aging, and related neurodegenerative, endocrine, and immune diseases;
- Memory genetics and the molecular basis of memory formation;
- Cognitive stimulation;
- Diagnosis and risk factors of dementia;
- The treatment and management of dementia;
- Behavioral and clinical manifestations of patients with dementia;
- Psychology and cognitive aging;
- Healthcare and rehabilitation for patients with dementia;
- Improving dementia patients' quality of life;
- Wearable devices and AI technology that can be applied in the diagnosis, treatment, or management of dementia, Alzheimer's disease, and other forms of cognitive decline.

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

Discounts on Article Processing Charges (APCs)

If you belong to an institute that participates in the MDPI Institutional Open Access Program

No Space Constraints and No Additional Space or Color Charges

No restriction on the maximum length of papers, number of figures, or use of color

Rapid Publication

First decisions in 19 days; acceptance to publication in 4 days (median values for MDPI journals in the first half of 2025)
