Message from the Editor-in-Chief

The Oman Medical Association (OMA) is thrilled to collaborate with MDPI to launch our peer-reviewed, diamond open access, international journal: *Journal of the Oman Medical Association (JOMA)*. The journal publishes original medical and surgical research, new clinical practices, risk management in healthcare, and research and innovation in medical education. Initially, *JOMA* will be published semiannually (in June and December) and will publish original research articles, review articles, short communications, clinical reports, case studies, etc. We intend to make *JOMA* a useful resource for promoting medical research and education in the region, and we wish to facilitate and encourage discussions, collaborations and debates related to healthcare. We hope to become a medium for introducing better ideas and disseminating knowledge among the healthcare providers and the scientific community. *JOMA* will be reaching out to all healthcare and allied healthcare professionals, medical/healthcare practitioners, researchers, medical students, academicians, and to readership in medical academic institutions. We welcome you to visit our website to know more about *JOMA*: <https://www.mdpi.com/journal/joma>.

Editor-in-Chief

Prof. Dr. Rashid Al Abri

Aims

The *Journal of the Oman Medical Association* (ISSN 2813-8759) is an international, multidisciplinary, peer-reviewed journal of healthcare, clinical medicine, and other scientific areas related to medicine and surgery. The journal is owned by the Oman Medical Association (OMA) and this journal will be published, preserved, archived, and distributed with no fees charged from either the authors or the readers (diamond open access). Every reader will have permanent free access to the scientific works published. The article processing charge (APC) will be covered by the association itself.

The aim of the *Journal of the Oman Medical Association* is to publish original medical and surgical research, new clinical practices as well as research and innovation in medical education, risk management in healthcare, and patient safety. It will also feature research reviews, preliminary studies, and case reports. All the articles/studies are peer-reviewed by our multi-disciplinary editorial board and by reviewers, comprising experts from different specialties in medicine and surgery, who also have extensive research and publishing experience. The journal will provide an international academic and scientific platform to actively promote and encourage research in all major disciplines of medicine and surgery.
