Message from the Editors-in-Chief

Green Health is an international, open access journal committed to promoting knowledge at the nexus of environmental sustainability and public health. Its scope encompasses original research articles, comprehensive reviews, and short communications, all aimed at fostering sustainable development for both human well-being and the environment. Our objective is to go beyond identifying environmental and health-related problems and to provide actionable solutions that address these challenges. We particularly encourage studies that combine problem identification with the development of practical and scalable solutions. Each year, we organize Special Issues that focus on emerging areas and interdisciplinary applications within the field of environmental and human health.
